

LaunchMind

Curing the builder's blindspot. Validate before you build.

AI-Powered Startup Validation & Interactive VC Pitch Engine

THE PROBLEM

The Startup Graveyard

Building blind, one assumption at a time.

Echo Chambers

Founders validate ideas with supportive friends instead of market realities.

Premature Optimization

Jumping straight into code before validating real customer pain points.

Consultancy Barrier

Expert startup advice and VC feedback stay expensive and out of reach.

Resource Loss

Billions of dollars and millions of builder-hours wasted every year.

35%

of startups fail because of 'No Market Need' — the #1 cause of failure, per CB Insights.

OUR SOLUTION

An AI Co-Founder & Silicon Valley VC

Always on. Never a yes-man.

Idea Interrogation

A personalized 5-question engine that grills your core assumptions.

Live Web Intel

Real-time search scraping surfaces active, live competitors.

Assumption Kill-Check

Surfaces the top 3 unvalidated risks that could kill the startup.

Action Roadmap

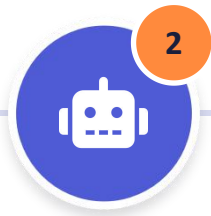

A structured 30/60/90-day plan with an actionable Day-1 checklist.

The 4-Step Validation Funnel

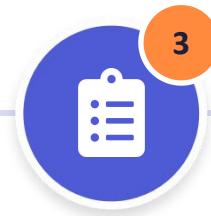

Raw Idea Input

Describe your vision in one simple sentence.

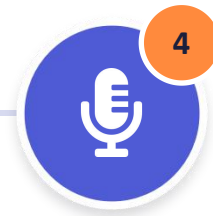

AI Interrogation

Answer 5 targeted questions — Normal or Roast Mode.

Plan Synthesis

AI builds your roadmap, competitor list, and market size.

Live VC Pitch

Defend your idea and earn a Venture Readiness Score.

Get Grilled by Simulated Partners

Real-time score tracking across three AI personas.

Marcus Vance

The Skeptic

Elena Rostova

The Growth Investor

Dr. Aris Thorne

The Deep-Tech VC

Real-Time Scoring

+10 for a strong answer, -5 for a red flag — updated live.

AI-Driven Due Diligence

4 rounds of sharp, semantic follow-ups on every pitch.

Ends in a blunt partner verdict — Invest, or Pass.

Our Execution Plan

COMPLETED

Phase 1 · Now

Core validation engine and VC Pitch Room MVP shipped.

IN PROGRESS

Phase 2 · Q3

User auth, project dashboards, and progress tracking.

PLANNED

Phase 3 · Q4

Voice-to-voice pitching and vector-based YC benchmarking.

GO-TO-MARKET

 Hackathon Partnerships

 GitHub Action

 Build in Public

 Startup Hub Onboarding

“To become the global standard for pre-seed project validation.”

Working Prototype

Deployed and open-source on GitHub today.

Incubator Partnerships

Licensing to university networks, venture studios,
and incubators.

Hackathon Integrations

The official pre-validation tool for hackathons
everywhere.

Scalable SaaS: Freemium (free) → Pro (\$19/mo) → Enterprise (custom) — plus API licensing.

THE TEAM

Team Dynamic Duo

Curing the builder's blindspot.

Swaraj Kumar Behera

Fullstack Developer & AI Integration Specialist

Prajakta Kuila

Frontend Engineer & Lead UI/UX Designer

Our goal: making startup validation accessible, fast, and objective.
